With the support of

Dear Friends and Colleagues,
It is a great pleasure to welcome you again for the 14th “Challenges in Laparoscopy and Robotics” meeting, this time being held in beautiful, enchanting Bordeaux. Now in its 14th consecutive year, the concept that initiated this adventure is not only alive, but vibrant and growing, showing great potential for the future of Urology.

The comprehensive scientific program will include live laparoscopic and robotic surgeries performed by the world’s most prominent urologic surgeons. In the past meetings, we have witnessed many challenging procedures. It is now time to expand our indications and to look forward to new challenges like robotic autotransplantation, augmented reality guided surgery, robotic inguinal lymphadenectomy for penile cancer, laparoscopic and robotic prostatic adenectomy, Level II-III Inferior Vena Cava Thrombus in RCC, laparoscopic pudendal nerve release, retroperitoneal robotic lymphadenectomy for testis and/or prostate cancer, retroperitoneal robotic partial nephrectomy, single port nephrectomy, complex laparoscopic advanced radical nephrectomy and fistulas and strictures. The technological advances like the automated instruments of Dexterità will be implemented. The third day we will have six challenging radical prostatectomies including the Retzius sparing RARP and the extrafascial radical prostatectomy for high risk cases and after irradiation.

As always, we will invite the best international speakers touching various topics to give you an up-to-date on the hottest topics in Urology. We are enthusiastically anticipating an extremely stimulating meeting. Live surgery, State-of-the-art lectures, discussions and thought-provoking debates will take place with the participation of the best urologists in the International arena. Three monitors will transmit three different live-moderated surgeries simultaneously. Each delegate will be provided with headphones with the possibility to connect with his/her preferred moderation.

We are very proud to host this 14th International Meeting in Bordeaux ten years after our first visit there. Bordeaux, the European cradle of urological laparoscopy, is the perfect city for old antiquities and innovative techniques to convene. We are confident that the challenging procedures that you will see will strongly enhance your own individual learning irrespective of your current level of expertise (basic or advanced) and lead the way towards defining the future of Urologic Surgery.

See you in Bordeaux!!

Congress Venue

Palais des Congrès

Avenue Jean Gabriel Domergue
33300 Bordeaux, Francia

Clothing

During the entire meeting, attire will be informal.

Climate

June is warm in Bordeaux and is the perfect time to visit and see all that the city has to offer. The average temperature during the day reaches 20°C or about 60°F, but average highs are 23°C (that's about 74°F). At night the lows average 16°C (about 61°F).

Letter of invitation

Participants requiring a formal letter of invitation from CiLR 2017, to enable them to make their arrangements, should contact the Operative Secretariat. It is understood that such an invitation is intended to help delegates to raise funds or to obtain a Visa and does not imply a commitment from the Congress Organizers to provide any financial support or scheduling of presentations.

Liability

Exhibitors

Coloplast Urology Care, involves diseases and symptoms of the urinary system, pelvic floor prolapse and the male reproductive system, such as urinary incontinence, kidney stones, enlarged prostate and impotence. The business area consists of a broad portfolio of products used in connection with urological and gynaecological surgery procedures and includes implants and single use devices. Coloplast manufactures and markets its single use devices for use before, during and after surgery, such as prostate catheters and stents, some of them under the Porges brand. The implant business manufactures urethral slings used to restore urinary continence and synthetic mesh products used to treat weak pelvic organ prolapse. The business also includes penile implants for men experiencing severe impotence that cannot be treated by using drugs, and testicular implants for reconstruction.

CONMED develops advanced surgical devices to minimize the impact of surgery on patients, from the AirSeal iFS System, HelixAR™ Electrosurgical Generator, 3DHD visualization solutions to Microlap Instruments™. We welcome you to explore our World of Solutions at the upcoming Challenges In Laparoscopy and Robotics 2017 in Bordeaux, booth #4.

Karl Storz is a renowned manufacturer that is well established in all fields of endoscopy and can be considered as market leader in rigid endoscopy. The still family held company was founded in 1945 in Tuttlingen, Germany, and has grown to one with a worldwide presence and 7100 employees. *Karl Storz* offers a range of both rigid and flexible endoscopes for a broad variety of applications. Today's product range also includes fully integrated concepts for the OR and servicing.

Exact Imaging is the developer and manufacturer of the world's highest resolution ExactVu™ micro-ultrasound system for prostate imaging and targeted biopsy. With the ExactVu system's resolution a 300% improvement over current standard-of-care ultrasound systems and superior resolution to MRI, urologists will be able to visualize suspicious regions and actually target (instead of blindly place) biopsies to those regions. The PRI-MUS™ evidence-based micro-ultrasound protocol helps to identify suspicious regions for targeting. For the minority of cases where MRI might assist (ie. prior negative biopsies), FusionVu™ is the forthcoming micro-US/MRI fusion application operating on the ExactVu micro-ultrasound platform.
