Dear Colleagues,

we are excited to invite you to the First Italian Congress of the Single Port Working Group, which will be held on February 20th and 21st, 2025 at the Fondazione Cariplo in Milan.

The congress will focus on an in-depth analysis of the first six months of using the SP robotic system in Italy, with particular attention to the extraperitoneal and transperitoneal approaches.

We will examine the pros and cons of each method through expert discussions, case presentations, and interactive sessions.

We believe this congress will offer valuable insights and foster collaboration among professionals working in this innovative field.

We look forward to your participation in this landmark event.

Best regards,

Franco Gaboardi
